

# How To Install Universal LED Cab Roof Lights For A Truck

This installation guide show you how to replace or add a set of Amber LED roof cab marker lights for your turck.

Written By: Eric Wu

## INTRODUCTION

LED roof cab lights are quite a customizable universal fit product, meaning that you're great for all kinds of trucks, SUVs, and RVs. You will need to check and see if your vehicle already has a set of roof cab lights. Otherwise, you need to drill a couple of holes so you can proceed with the wiring. This LED roof cab light set comes with 5 cab LED roof lights with 10 screws and 10 washers to complete your installation.

You can get these [Truck Roof LED Cab Lights](#) on Amazon for just 46.99 dollars a set.

### TOOLS:

- [Drill](#) (1)
- [Screw Driver](#) (1)
- [Electrical Tape in 6 Assorted Colors](#) (1)
- [Ruler](#) (1)

### PARTS:

- [Universal Fit Truck LED Cab Roof Lights \(5 pieces\)](#) (1)
- [LED Cab Roof Markers](#) (1)

## Step 1 — Remove the truck interior front map lamps

- There are a couple ways you can power up this LED. You have the choice of adding a switch or just using the truck's interior light switch. For demonstration purposes, we are using the truck's interior lights to power up the entire assembly.
- Expose the wires by removing the entire front map light assembly.

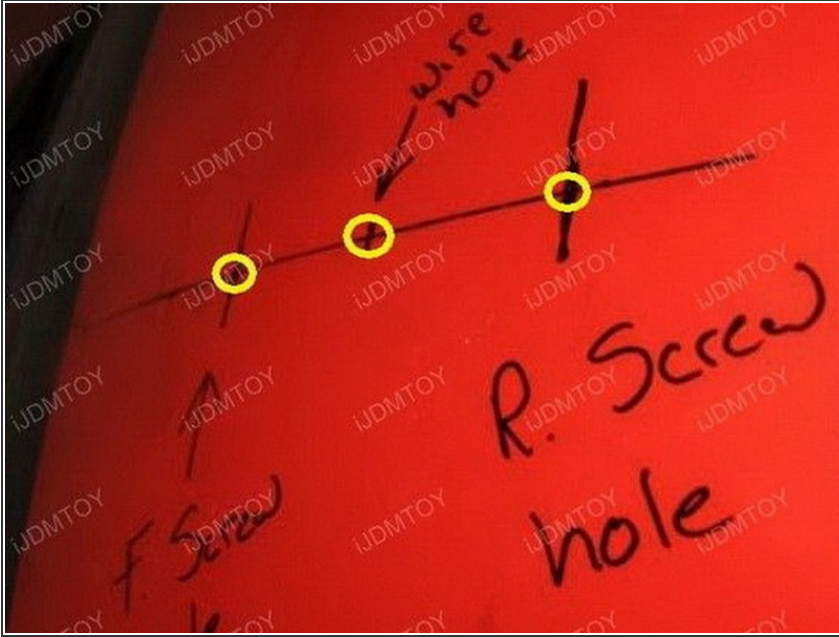

## Step 2 — Do the measurement on the cab roof

- Get up to the roof of your truck to measure where you're going to install these LED cab roof lights. You can use a dry erase marker to mark all the points where you will be drilling into the roof.

### Step 3 — Drill holes

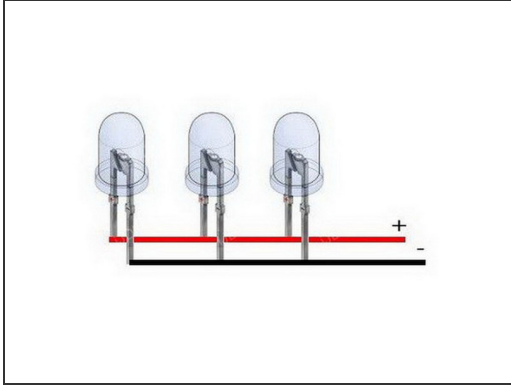

- Get up to the roof of your truck to measure where you're going to install these LED cab roof lights. You can use a dry erase marker to mark all the points where you will be drilling into the roof.

### Step 4 — Mount the LED cab roof lamps

- Use a screwdriver and attach the screws at the front and the rear of each LED roof lamp to permanently mount it.

## Step 5 — Wiring

- Wire up the LED lights in parallel. Use some electrical tape to secure the connections. Route the wires through the front map light assembly to complete the wiring portion.

## Step 6 — Enjoy your new LED cab roof marker lights

- Test everything and enjoy your new LED cab roof light.
